

Webinar Conference Announcement on Euro Atomic Physics 2020

Maxim

Department of Physics, Cambridge University, UK; E-mail: maxim.pv@gmail.com

We are pleased to welcome to Webinar on **"7th International Conference on Atomic Physics and Nuclear Physics"** after the successful completion of the series of Cardiology Congress. The conference is scheduled to take place in July 27-28, 2020. This Euro Atomic Physics 2020 conference will provide you with an exemplary research experience and huge ideas.

The perspective of the Atomic Physics and Nuclear Physics Conference research to help people understand how treatment techniques have advanced and how the field has developed in recent years.

[Atomic Physics](#) is the study of atoms as an isolated system of electrons and an atomic nucleus, whereas nuclear physics studies the constituents (protons and neutrons) and interactions of atomic nuclei. Atomic Physics also describes the physics of molecules and their properties. The essential concerned is with arrangement of electrons around the nucleus and the processes by which these arrangements change which includes ions and neutral atoms. In nuclear physics the various applications are Radioactive dating (geology, paleontology, archeology, art), [Nuclear medicine](#) (Medical Diagnosis (PET, MRI) cancer treatment with proton or heavy-ion beams), Electric power generation (nuclear fission / fusion reactors), National Security (nuclear weapons stockpile), ion implantation in materials engineering.

Recent Progress and Innovations in Physics

We are delighted to announce our 5th International Conference on Applied Physics which is to be held in Melbourne, Australia on August 12-13, 2020. The conference has many categories for the participants to participate such as prompt keynote presentations, Oral talks, poster presentations and exhibitions on Applied Physics.

This conference is organized under the theme 'Exploring Advancements in Applied Physics' which opens a pathway to innovations and inventions.

Physics 2020 will provide you with the greatest experience to witness the latest research and technological development in the field of Physics. This will be the perfect moment to participate in the scientific discussion with global scientists. Physics 2020 targets audience in the field

of physics such as Eminent personalities, Directors, CEO, President, Vice-president, Research scientists, Organizations, Post-doctorates and Doctorates, Associations heads and Professors, Physics laboratory heads, students, other affiliates related to the area of Applied Physics.

With members from around the world centred on learning regarding physics, this can be your single best chance to succeed in the biggest assemblage of participants from the hospitals, Universities, community, etc. This Annual Meeting can conduct demonstrations, distribute data, meet with current and potential researchers and receive name recognition at this 2-day event. World-renowned speakers, the foremost recent techniques, tactics, and therefore the newest updates within the physics field square measure hallmarks of this conference.

To improve the field and make individuals mindful of it. The sorting out board of trustees chose to hold a meeting. [Atomic Physics](#) is one of the quickly developing and creating territories of Functionality of Atomic Physics and Nuclear Physics.

Individuals who have missed going to the past meeting are generally free to show your exploration thoughts at the 2020 Atomic Physics gathering. This gathering will assist you with improving systems administration with prominent individuals in the field of transplantation.
